About

Passionate fullstack developer with expertise in technological innovation, bringing 12 years of restaurant experience that forged strong skills in stress management and teamwork. Successful career transition to tech with specialization in blockchain/Web3. Active open source contributor and hackathon participant.

Skills

Backend Languages: Go, Rust, Python, C, Gno (blockchain)

Frontend & Web: JavaScript/TypeScript, React, Next.js, HTML5, CSS3

Blockchain & Web3: Smart Contracts, DApps, Gno.land, Solidity basics

Development Tools: Git, Docker, Linux, CI/CD, VS Code, Figma, Notion, Trello

Databases: SQL, PostgreSQL, SQLite, Redis (basics)

Soft Skills: High-pressure stress management, team leadership, systematic debugging

Professional Experience

Open Source Contributor – Gno.land All in Bits February 2024 - Present

- ▶ Developed complete auction DApp on Gno.land ecosystem (innovative blockchain) • 500+ lines of Gno code
- ▶ Created 5+ secure smart contracts and reusable packages in Gno language • 90% unit test coverage
- ▶ Active participation in code reviews (20+ PRs reviewed) and community mentoring • 3 new contributors onboarded
- ▶ Contributed to emerging Web3 ecosystem with focus on scalability

Student Developer – Zone01 Rouen (42-style peer-learning school) 2022 - 2024

- ▶ Intensive project-based training (2000+ hours) in innovative 42-style school
- ▶ Developed complete social network (Go backend + Next.js frontend) • 1000+ simulated users
- ▶ Mastered complex algorithms: graphs, optimization, advanced data structures • 95% project success rate
- ▶ Collaborative learning and peer mentoring (15+ team projects) • 100% team success rate

Pizza Chef & Kitchen Assistant – Restaurant Industry 2010 - 2022

- ▶ Managed kitchen production under pressure while meeting deadlines • 200+ covers/service
- ▶ Worked in dynamic and demanding team environment • Teams of 5-8 people
- ▶ Developed skills in organization, multitasking and rapid problem solving • 0 customer complaints
- ▶ Customer service and adaptation to specific demands

Internship – SONEGAS Algeria 2010

- ▶ Real-time data analysis via SISCOM system (4 months)

Education & Certifications

- Fullstack Developer – Zone01 Rouen (42-style peer-learning school) (2022 - 2024)
- Master's in Automation & Industrial Computing – UPJV Amiens (2013 - 2014)
- Master's in Electrical Networks – Ibn Khaldoun University, Tiaret (2004 - 2009)
- Open Source: Gnolang Contributor • Hackathons • 10+ GitHub repositories • Gnoland Project

Projects & Technical Achievements

- Kolise - Blockchain Betting App

July 2025

▶ Decentralized betting application on Chiliz blockchain • React/Next.js • Solidity smart contracts • Modern interface with 5+ betting features
- Gnoland Blockchain Auction DApp

2024

▶ Decentralized application with secure smart contracts • React/Next.js interface • 20+ open source commits • Real-time auction system
- Fullstack Social Network & Algorithms

2022-2023

▶ Go backend with REST API • Next.js frontend • Optimized algorithms: Lem-in (graphs), Filler (Rust AI) • 40% performance improvement
